Some films in recent decades have been recorded using analog video technology similar to that used in television production. Modern digital video cameras and digital projectors are gaining ground as well. These approaches are preferred by some film-makers, especially because footage shot with digital cinema can be evaluated and edited with non-linear editing systems NLE without waiting for the film stock to be processed. The migration was gradual, and as of 2005, most major motion pictures were still shot on film.needs update
